HARD SKILLS

LANGUAGE

English B2
(Cambridge)

French B1

PERSONAL

I am an optimistic, organized, punctual person and I act effectively under pressure. I'm a fast learner and I'm open to new experiences. I work well in a team and I believe that any problem can be solved through research and communication.

VOLUNTEERING AND EXTRACURRICULAR ACTIVITIES

(july 2022 - july 2023)

Students' Union of Statistical Cybernetics and Economic Informatics, SISC

Lead Front-end of the IT department

Following my active involvement as a simple member of the department, I felt the need to get more involved in the organization, but also to further develop the technologies I had worked with up to that point. That is how I came to be able to teach others, moreover, to develop a constant learning cycle along with the department's director and the Back-end lead which would ensure a harmonious growth of all members, from a technical point of view.

(2021-present)

Students' Union of Statistical Cybernetics and Economic Informatics, SISC

Member of the IT department

My experience at SISC has helped me not only from a professional point of view, helping me to gain knowledge and work experience on the Front-End Development side, but also from a personal point of view. This organization gave me the opportunity to work alongside serious, determined people and helped me develop my communication skills.

(july 2022 - october 2022)

Students' Union of Statistical Cybernetics and Economic Informatics, SISC

Coordinator of the ITFest project, XV-th edition, 2022

ITFest was one of my soul projects, as it represents the mark that I left upon SISC. The events related to this project were: JobHub, 5 Workshops regarding IT topics, as well as personal development, an Algorithmic contest and 3 Hackathons. By coordinating this project I have improved my communication, organization and leadership skills.

(2018-2020)

H-tech robotics team

Mechanical Department Volunteer

Within this project I managed to develop my programming skills in Java, I developed my strategic thinking and my organizing skills, management, and even marketing, as I took part in the founding of this robotics team, which is still active and grows even to this day.

(30 november 2022)

ITFest 2022, organized by SISC

Participant Hackathon N-able

This experience is a recent one and I can say that it was one of the most enjoyable ones so far. Together with two friends, we created a web application, over the course of 10 hours, using technologies as: HTML, CSS, JavaScript and Node Js with Sequelize. In order to facilitate teamwork we used the Gitlab platform. We did not manage to rank among the top 3, but we came on fourth place, with a close score.

HOBBIES

Blog

Poetry

(march-april 2023)

Organized by Ubisoft

Web Dev internship trainee at Ubisoft

This internship represented for me an opportunity to explore the field of web development within a company. I attended a series of courses organized by Ubisoft, courses about a lot of technologies or concepts used in the field, such as JavaScript, React, API Calls, Monitoring, and Containerization using Docker.

(april - july 2023)

Organized by Chess Coders

Web Dev internship trainee at Chess Coders

During this experience, I attended numerous training sessions that aimed to lay the foundations for a final project, namely a travel agency (detailed in the Projects section). I participated in both front-end training (HTML, CSS, JS, React) and back-end training (Node JS with Express, MongoDB, and Postman).

EDUCATION

Ion Creanga National College

september 2017 - june 2021

Bachelor Degree Economic Informatics

(Statistical Cybernetics and Economic Informatics, ASE)

october 2021 - present

Software Applications Informatics Certificate

(Ion Creanga National College)

september 2020 - june 2021

COURSES

Java

InfoAcademy

iulie 2018 - noiembrie 2018

PROJECTS

Project OOP C++

(Statistical Cybernetics and Economic Informatics, ASE)

PigGame Udemy JavaScript
